

## Activity C3:

Websites with good design.

<https://eeeca.byu.edu>

As a site designed to help students and prospective students determine whether to become a teacher, this site is well organized with a home link, a self explanatory upper right hand side menu and several locations to find crucial information organized in a simple manner with appealing images.

Websites with design that could be improved

<https://my.byu.edu>

The screenshot displays the myBYU website interface. At the top, there is a navigation bar with tabs for 'Activity C3: Learning', '10 Principles of Good We...', 'Home | Teaching in Utah', 'BYU Learning Suite', and 'My Brigham Young Univer...'. Below this is a search bar and a 'Welcome Elijah Ryan' message. The main content area is divided into several sections:

- Campus Favorites - Student:** A sidebar menu with links to Campus Resources (Academic Planning, Books I need for classes, BYU Careers, Enrollment Services, Learn Anywhere, Learning Suite, Library Search, Lookup a Person, My Financial Center, MyMap, Record Summary, Register for classes, Undergraduate Catalog, University Gradebook, YMessage) and Personal Information (Account Management, Change Password or Security Questions, Register Vehicles & Pay for Parking, Update my Personal Information, View Grades and Academic Progress).
- Personal Notices:** A section with a 'View: All | Today' filter and a 'Refresh' button. It displays 'You have 0 notifications.'
- University Announcements:** A section with a message 'There are no university announcements at this time.' and a 'View Previous...' link.
- Course Schedule and Grades:** A section with a 'Schedule' tab and a 'Term: Winter Semester 2022' dropdown. It contains a table with the following data:

| Course                                      | Instructors        | Time              | Days    | Location |
|---|--------------------|-------------------|---------|----------|
| C S 240<br>Adv Programming Concepts         | Stephens, Thomas E | 3:30 PM - 4:45 PM | T, Th   | MARB 130 |
| C S 260<br>Web Programming                  | Clement, Mark Joel |                   | T, B, A | TBA      |
| REL C 225<br>Foundations of the Restoration | Woods, Fred Emmett | 2:00 PM - 2:50 PM | M, W    | JSB 182  |

As a site that contains a plethora of necessary information, the my.byu.edu site functions spectacularly when it is taken into account the huge amount of data that it processes. The architectural design could be improved to make it more visually appealing as it is very unornamented and the visual design could be vastly improved. All things considered, and having some knowledge of how complicated the code behind it is (having worked on it) it is sufficient for the needs of the students even if it has a large learning curve.
